

# Refining outdoor living Guardian Veranda

# The Guardian Veranda is a contemporary aluminium veranda system engineered to transform outdoor spaces into elegant, functional living areas.

Designed and developed in-house by **Guardian Building Systems**, it combines structural strength, clean architectural lines, and intelligent detailing to deliver a veranda that is as practical to install as it is impressive to experience.

Whether you are creating sheltered outdoor seating, extending usable living space, or enhancing the value of a property, the Guardian Veranda provides **year-round protection** with modern style.

## Designed for Performance. Built for Lifestyle.

Unlike traditional veranda systems, the Guardian Veranda is constructed entirely from aluminium, offering superior durability, stability, and long-term performance with minimal maintenance.

The system accommodates 6.4mm laminated glass or 6mm polycarbonate, allowing flexibility in design, light transmission, and budget. Integrated guttering ensures effective water management while maintaining a sleek, uninterrupted aesthetic.

## Tailored to Every Space

The Guardian Veranda can be configured to suit a wide range of applications, from residential gardens to commercial terraces. Its modular design allows for bespoke layouts, sizes, and finishes, ensuring each installation reflects the unique character of the property and the requirements of the client.

**From initial concept to installation, the Guardian Veranda has been engineered to deliver reliability, versatility, and visual impact.**

### Flexible Sizing\*

Standard sizes can project up to 3.6 metres when fitted with laminated glass units and up to 3.8 metres with solid polycarbonate, with spans of up to 6.3 metres. This provides excellent design flexibility for a wide range of spaces.

### Engineered Aluminium

A robust all-aluminium framework delivering exceptional strength, durability, and long-term performance with minimal maintenance.

### Flexible Roofing Options

The system is compatible with recommended 6.4mm laminated glass or 6mm solid polycarbonate, enabling performance, aesthetics, and cost to be tailored to the requirements of each installation.

\*Bespoke sizes with larger spans are also available, subject to a further bespoke specification.

### Variable Roof Pitch

The system features a variable roof pitch, adjustable from 4° to 40°, allowing optimal drainage, architectural integration, and design freedom to suit different buildings and environments.

### Integrated Guttering

Discreet, built-in drainage ensures effective water management while maintaining a clean, contemporary finish.

### Simple Installation

Engineered to simplify installation, reducing on-site time while maintaining premium build quality.

### Architectural Aesthetic

Slim aluminium profiles and refined detailing complement both modern and traditional properties.

# Designed for Real Life Outdoors

The Guardian Veranda is a versatile outdoor structure designed to enhance how you use your home and garden. Whether for everyday living or special occasions, it creates a sheltered, stylish space that can be enjoyed throughout the year.

## Outdoor Dining and Entertaining

Create a sheltered dining area for family meals, barbecues, and social gatherings. The Guardian Veranda provides protection from rain and sun while maintaining natural light.

## Garden Living Space

Extend your living area into the garden with a comfortable outdoor seating space. Ideal for relaxing, reading, or spending time with family in a sheltered environment.

## Patio and Terrace Cover

Transform patios and terraces into usable spaces regardless of the weather. The veranda provides year-round usability while enhancing the architectural appearance of the property.

## Carport and Vehicle Protection

The Guardian Veranda can be configured as a stylish carport, offering protection for vehicles from rain, frost, and sun while maintaining a clean, modern aesthetic

## Outdoor Workspace

Create a sheltered outdoor workspace or hobby area, ideal for home working, DIY projects, or creative activities with natural light and weather protection.

## Entrance and Walkway Canopy

Enhance entrances, doorways, and walkways with a sleek aluminium canopy that offers practical shelter and architectural impact.

## Commercial and Lifestyle Spaces

Suitable for cafés, restaurants, and hospitality environments, providing covered outdoor seating that extends usable commercial space.
